SUMMARY

Known for transforming product requirements into scalable architectures, introducing AI-driven automation, and delivering results at exceptional speed while ensuring long-term maintainability. Adapts quickly to new environments, steps into leadership roles confidently, and engages in open, strategic discussions to identify the most effective solutions.

WORK EXPERIENCE

LearnWorlds

Jun 2025 - Present

Full-Stack Software Engineer (AI Team)

- Building and maintaining scalable SaaS features serving 20M+ learners across 150+ countries.
- Architected the core AI infrastructure powering page builders, assessments, content generation, AI assistants, and image-generation features across the platform.
- Played a key role in architectural and product discussions with the CPO and PMs, supported by continuous AI research that enabled early adoption of innovative features.

Digipro Education & Funecole

Jan 2024 - Jun 2025

Lead Developer

- Led the development of a multi-tenant architecture with optimized APIs, background jobs, and real-time data updates using websockets.
- Simultaneously built a new platform from scratch with a completely new architecture while maintaining and improving the existing one.
- Collaborated directly with the CEO and COO on product and architectural decisions, and mentored new team members to accelerate their growth.

Semantic Business Software

Jan 2021 - Jan 2024

- Designed and delivered the company's first full CRM platform, fully integrated with ERP and internal systems.
- Introduced reusable modules and packages while enforcing coding standards, structured architecture, and long-term maintainability across all projects.
- Operated fully autonomously while also being a strong team contributor, often leading projects end-to-end.

EDUCATION

BSc Applied Informatics, University of macedonia

2016 - 2021
